PERSONAL PROFILE

I'm a junior front-end developer with nearly two years of work experience, primarily working with **JavaScript**, **TypeScript**, **React**, and **Next.js.**

I have hands-on experience with **React**, **Redux**, **Node.js**, **Express**, and **Next.Js.** I'm comfortable working with front-end and a little bit of back-end technologies. I have a solid understanding of **HTTP Requests**, **REST APIs**, and **Git/Git Flow**, and I've used **Docker** for containerizing my projects. I understand the concept of the **CI/CD pipeline**.

I have base knowledge of the differences between Git Flow and trunk based development. Frequently in my work I use **Agile/Scrum** environment, using **Jira** for ticket management and **Confluence** for documentation, also I have good understanding of **Agile Manifesto**.

I've also worked with **Firebase** and **Supabase** for back-end solutions and used tools like **Postman** and **Reqbin** for API testing. I have base experience with **OAuth**, and **JWT** for authentication.

One of my biggest learning experiences came from a full-stack project I built using React, JavaScript, SASS, Node, Express, MongoDB, and Docker. It helped me solidify my understanding of the development workflow, debugging, and best practices. I'm comfortable working with Windows and Mac, and my daily tools include VSCode, Chrome DevTools, React Developer Tools, Redux Toolkit, Slack, Discord, and ChatGPT.

I have experience with hosting on platforms like **Firebase** and **Vercel**.

WORK EXPERIENCE

UBBSLA | July 2023 - present

IT COMMUNICATION & DISSEMINATION MANAGER

- Developed **React Websites (SPA)** with responsive design, ensuring high performance and excellent user experience.

- Implemented **authentication** using **Firebase**, state management with **Redux** and **Context API.**

- Integrated external **APIs** using **Axios** and **Fetch** to seamlessly retrieve and display dynamic data, enhancing site functionality

- Designed **wireframes** and **UI in Figma** before coding, focusing on simple, clean and fast-loading websites.

- Utilized **TailwindCSS** for efficient styling, and deployed applications on Superhosting to ensure scalability and performance.

- Integration with **Google Maps API/Stripe** payments and Resend for email notifications.

LYUBOMIR ILIEV
Junior Front-end Developer

ADDITIONAL SKILLS

Proficiency in using browser developer tools for debugging code to identify and fix issues.

Willingness to learn new technologies, stay updated with industry trends, and improve skills through self-learning.

Driving License, category: B
